I have provided more than I can say from my own philosophical insight

I have provided more than I can say from my own philosophical insight
We have two right angles as base angles. If a triangle has two right angles, it cannot be a triangle. Therefore, a triangle cannot have two right angles.

Also, if a triangle has two right angles, it cannot be a triangle. Therefore, a triangle cannot have two right angles.

Thus, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.

Therefore, a triangle cannot have two right angles.
