The Problem of Non-Discursive Thought from Goethe to Wittgenstein

Syllabus

Course Description

The problem of non-discursive representation, posed in its most general form, can be formulated as the question: How can a particular, non-discursive item have general significance? This problem of what we might call, with Hegel, the concrete universal assumes a variety of expressions in almost every discipline: How is a picture so much as able to convey a determinate intelligible content – a content that admits of understanding and misunderstanding? How is it that a diagram or geometrical construction shows something general (how things are in all cases of a certain kind, not just how things are with respect to this triangle)? How are paradigmatic examples (according to Kuhn’s theory, a crucial vehicle of instruction and inquiry formation in physics) understood and elaborated? How is it that a poem means more than it merely says and thus escapes reduction to any of its possible paraphrases?

Although our seminar is concerned to get a handle on this problem in its full generality, our path into it will be historical, genealogical and comparative. The historical point of departure for the seminar will be a moment in the (broadly speaking) German Enlightenment – a moment in which, we claim, the question of the nature of concrete universals was first posed in its full generality. Anecdotally, we can locate this moment in the conversation that took place between Goethe and Schiller on July 7, 1794, in which Goethe claimed – although by the lights of the strict Kantian Schiller this was impossible – to “see Ideas”. Indeed, the central notion of Goethe’s own scientific research and, arguably, of his aesthetic theory – the notion of the Urphänomen – presupposes just this capacity of non-discursive representation or “intuitive understanding.” We will locate the other chronological edge of our historical frame in the work of the later Wittgenstein, where we find a kindred insistence on the fundamental importance of non-discursive representation as evidenced in such notions as that of perspicuous insight, aspsectual seeing, family resemblance, and Übersicht (synoptic grasp). Our aim is to explore some of the crucial way-stations between Goethe and Wittgenstein in the exploration of these ideas, starting with their initial articulation in the work of late 18th and early 19th century German philosophers (especially Kant and Hegel) and tracing them up to their most recent forms of development and contemporary inheritance in the work of contemporary scholars and thinkers, such as Stanley Cavell, Michael Fried, and John McDowell. A more detailed description of the course can be found at our website: http://hum.uchicago.edu/frankeinstitute

The course itself is part of a larger full-year project funded by a Mellon Foundation Sawyer Seminar grant, with additional funding assistance coming from The Division of Humanities, The Franke Center, the Wittgenstein Workshop, the Center for Interdisciplinary Research, and Robert Pippin’s Mellon Foundation Grant. In addition to the opening conference and our bi-weekly visitors in the Fall and Winter Quarters, these contributors have also provided funding for three further visitors in the Spring Quarter, including an extended series of lectures by John McDowell, and a closing conference in the fall of 2007. More information about these events can be found, as it becomes available, at our website.

### The Structure of the Seminar

The seminar is open to and intended for both graduate students and faculty. The seminar will meet every Thursday from 3 to 6pm. Except for the occasional scheduling irregularity in the winter, on the even-numbered weeks of each quarter there will be visitors to the seminar who will assist us in exploring the themes of the course, while the odd-numbered weeks will be devoted largely to preparation for these visits. Students taking the course for credit are required to attend all meetings of the course.

On the weekend following the second meeting of the seminar, there will be an opening conference to set some of the themes of the course. All of the visitors but one who will come over the course of the year will be present at the conference. Slightly over half of them will present papers at the conference.

In addition, there will be a weekly graduate section which is only open to (and moreover mandatory for) graduate students taking the course for credit. Anyone who plans to attend the seminar is urged to attend the opening conference.

### Satellite Events

No one participating in the seminar is required to attend the satellite events attached to this seminar. Also, unlike the weekly meetings of the seminar, no advance permission is required in order to attend any of the satellite events.

Over the fall and winter quarters of this academic year, many of our visitors will participate in an additional seminar discussion of their work, hosted by the Wittgenstein Workshop on the Friday following their Thursday Sawyer Seminar session. The schedule of those events can be obtained from Kristin Boyce at keboyce@uchicago.edu

In May, 2007 John McDowell will give a series of lectures on perception and action, and in late May and Early June, we will conclude our events for this academic year with seminars with Andrea Kern and Sebastian Roedl. The project will conclude as a whole with a final conference, reconvening all of our visitors from the previous year, in the Fall of 2007.

### Course Requirements
The seminar is open to graduate students and faculty. No advance permission is required for any University of Chicago faculty who wish to attend the seminar. Advance permission from the instructors is required for any faculty from other universities or any graduate students from any university who wish to attend the seminar.

In addition to attendance at the weekly seminar meetings and the opening seminar conference, students taking the course for credit will be required to complete one of the following three requirements:

1. One 30 page paper due at the end of Winter quarter
2. Two 15 page papers, one due at the end of each quarter
3. One 15 page paper due at the end of Fall, which is then expanded into a 30 page paper due at the end of Winter quarter

Students taking the course for credit must meet with a faculty member before 10th week of Fall quarter to discuss possible paper topics. Any student taking the course for credit is also required to attend the weekly graduate student discussion section.

Required Texts and Readings

The following English (and German) texts are available at the Seminary Co-op:

- Kant, *Critique of Pure Reason*
- Kant, *Critique of Judgment*
- Goethe, *Theory of Colours*
- Hegel, *Phenomenology of Spirit*
- Wittgenstein, *Philosophical Investigations*
- Fried, *Absorption and Theatricality*
- Fried, *Art and Objecthood*

The rest of the readings will be available through the Regenstein library e-reserve page or through the Seminar’s Chalk website.

The readings for each week divide into required readings and background reading. Students taking the course for credit are expected to do the required reading. The background reading is entirely optional.
